

Remarks

After amendment, claims 40, 51-56 and 67-69 remain pending in the present application. Claims 68 and 69 are new. Claims 57-65 and claims 1-39 have been cancelled previously *without prejudice*. Support for the amendment to the claims can be found throughout the originally filed application and claims. No new matter has been added by way of this amendment.

Applicants note that any subject matter which is cancelled herein, including any subject matter canceled from previously pending claims is made *without prejudice* in order to give Applicant a chance to consider filing any one or more divisional/continuation applications to seek allowance of that subject matter. The present amendments have been made to expedite allowance of the instant application and, in particular, to address the enablement issue associated with cancers that are other than solid tumors. The presently pending claims are now directed to the use of the compounds as claimed in treating solid tumors and cancers as otherwise set forth in the claims. The treatment of the claimed tumors/cancers as set forth in the claims is consistent with the activity of the claimed compounds as anti-angiogenesis agents. The previously presented declaration of Dr. Jack Arbiser was enclosed in support of the enablement of the present invention. The assays presented therein evidenced that solenopsin exhibits substantial antiproliferative activity in both cells assays which is consistent with its use as an anticancer agent as is claimed.

Given the rejection which is maintained, Applicants respectfully request an interview with Examiner Gullede prior to the issuance of a first office action in order to provide guidance to the present inventors in addressing the rejection.

Applicants also request that the Examiner consider the information disclosure statement filed in September, 2010.
